

# Data Estate Migration Workshop

Transform your data estate to a complete, robust, end-to-end data platform.

Extended support for SQL Server 2008 and 2008 R2 is coming to an end on July 9, 2019, which means it's time to choose your path to modernization.

Move to SQL Server 2017 and Azure Data Services to get the industry-leading data platform with built-in security, enhanced performance and analytics to modernize your business.

Without support for SQL Server 2008 and 2008 R2, security updates will no longer be available, and you might be at risk of not being compliant with industry requirements such as GDPR (General Data Protection Regulation).

So start your migration journey today!

# Data Estate Migration Workshop

The Data Estate Migration Workshop is a 1-day workshop to explore and discover the right migration journey for your business.

## *Workshop Agenda*

### ➤ Microsoft Data and AI Cloud Strategy

Briefing on the Microsoft Data & AI capabilities.

The objective is to ensure all discussions during the workshop are informed by a complete customer understanding of Microsoft capabilities.

### ➤ Customer Business Strategy & Data Estate Strategy

The objective is to understand your current data estate environment and strategy, and to identify of potential near term projects which require data estate modernization to support this business strategy.

### ➤ As-Is Data Estate Discovery

Further investigation and discussion on data estate modernisation, for example:

- Identification and go forward plan for any End of Support Windows or SQL 2008/R2 applications.
- High level, white board driven architecture on existing systems.
- White board session on possible future cloud architecture solutions.
- Identification of low-risk systems which can move to Azure.

## *The outcome and follow-up of the workshop includes*

- Identification of existing candidates for Azure migration
- For an agreed candidate application, a **Design Topology**, monthly **Azure Costs** and a **WBS** (Work Breakdown Structure) on the effort required for the migration.
- Free of charge attendance to Spanish Point's 1-Day Lab-based **Azure Bootcamp** and/or the **Azure Data Platform & Machine Learning Bootcamp**.

Ready to Modernise?
